

API Observation Report

Observation ID	Title	Endpoint	Severity	Priority
OBS_001	Empty POST body accepted	POST /posts	Low	Low
OBS_002	Missing required fields accepted	POST /posts	Low	Low
OBS_003	Invalid data types accepted	POST /posts	Low	Low
OBS_004	PUT/PATCH updates are not permanently stored	PUT/PATCH /posts/1	Low	Medium
OBS_005	DELETE operation is simulated	DELETE /posts/1	Low	Medium

Observation 1

Observation ID: OBS_001

Title: Empty POST request body is accepted

Endpoint: POST /posts

Steps to Reproduce

1. Open Postman.
2. Select POST `/posts`.
3. Leave the request body empty.
4. Click **Send**.

Expected Result

API should return **400 Bad Request**.

Actual Result

API returns **201 Created**.

Severity: Low

Priority: Low

Observation 2

Title: Missing required fields accepted

Steps

1. Send:

```
{  
  "title": "QA"  
}
```

Expected Result

Validation error.

Actual Result

201 Created.

Observation 3

Title: Invalid data types accepted

Request

```
{  
  "title":123,  
  "body":true,  
  "userId":"ABC"  
}
```

Expected Result

Validation error.

Actual Result

201 Created.

Observation 4

Title

PUT/PATCH changes are not permanently stored.

Expected Result

Updated data should persist.

Actual Result

Changes are simulated.

Observation 5

Title

DELETE operation is simulated.

Expected Result

Resource should no longer exist.

Actual Result

Resource can still be retrieved because the API is a mock service.
