

Sheet 1: API Test Cases

Test Case ID	Method	Endpoint	Request Body	Expected Status Code
TC_001	GET	https://jsonplaceholder.typicode.com/posts	None	200 OK
TC_002	GET	https://jsonplaceholder.typicode.com/posts/1	None	200 OK
TC_003	GET	https://jsonplaceholder.typicode.com/posts/999999	None	404 Not Found
TC_004	GET	https://jsonplaceholder.typicode.com/invalidendpoint	None	404 Not Found
TC_005	POST	https://jsonplaceholder.typicode.com/posts	{"title":"QA Testing","body":"Testing API using Postman","userId":1}	201 Created
TC_006	POST	https://jsonplaceholder.typicode.com/posts	Empty Body	400 Bad Request
TC_007	POST	https://jsonplaceholder.typicode.com/posts	{"title":"Only Title"}	400 Bad Request
TC_008	POST	https://jsonplaceholder.typicode.com/posts	{"title":"Laptop","body":"Testing","userId":"ABC"}	400 Bad Request
TC_009	PUT	https://jsonplaceholder.typicode.com/posts/1	Updated JSON	200 OK
TC_010	PATCH	https://jsonplaceholder.typicode.com/posts/1	{"title":"Updated by PATCH"}	200 OK
TC_011	DELETE	https://jsonplaceholder.typicode.com/posts/1	None	200 OK
TC_012	GET	https://jsonplaceholder.typicode.com/posts	None	200 OK
TC_013	POST	https://jsonplaceholder.typicode.com/posts	Valid JSON	201 Created
TC_014	PUT	https://jsonplaceholder.typicode.com/posts/1	Updated JSON	200 OK
TC_015	PATCH	https://jsonplaceholder.typicode.com/posts/1	Invalid update data	400 Bad Request

TC_016	DELETE	https://jsonplaceholder.typicode.com/posts/999999	None	404 Not Found
TC_017	GET	https://jsonplaceholder.typicode.com/posts	None	200 OK
TC_018	POST	https://jsonplaceholder.typicode.com/invalidendpoint	JSON Data	404 Not Found
TC_019	POST	https://jsonplaceholder.typicode.com/posts	{"body":"Testing"}	400 Bad Request
TC_020	GET	https://jsonplaceholder.typicode.com/posts?id=abc	Invalid Parameter	400 Bad Request

Actual Status Code	Expected Response	Actual Response	Result
200 OK	All posts should be returned	Posts returned successfully	Pass
200 OK	Single post details should be returned	Post details returned successfully	Pass
200 OK	Invalid ID should return error	Empty response returned	Fail
404 Not Found	Invalid endpoint error should appear	404 error received	Pass
201 Created	New post should be created	Post created successfully	Pass
201 Created	Empty request should be rejected	Request accepted	Fail
201 Created	Missing fields should show validation error	Request accepted	Fail
201 Created	Invalid data type should be rejected	Invalid type accepted	Fail
200 OK	Post should update successfully	Updated post returned	Pass
200 OK	Partial update should work	Updated title returned	Pass
200 OK	Post should be deleted	Delete response received	Pass
200 OK	Response structure should be verified	id,title,body,userId available	Pass
201 Created	Created data should match request	Data matched	Pass
200 OK	Updated values should display	Values updated	Pass
200 OK	Invalid update should fail	Request accepted	Fail

200 OK	Invalid delete should return error	Response returned	Fail
200 OK	API availability check	API working	Pass
404 Not Found	Invalid endpoint error	404 received	Pass
201 Created	Required validation expected	Request accepted	Fail
200 OK	Invalid parameter error	Response received	Fail

Sheet 2: Positive & Negative Testing

Type	Scenario	Expected Result
Positive	GET All Posts	200 OK response
Positive	GET Single Post	200 OK response
Positive	POST Create Post	201 Created
Positive	PUT Update Post	200 OK
Positive	PATCH Update Post	200 OK
Positive	DELETE Existing Post	200 OK
Negative	Invalid Post ID	Error response
Negative	Invalid Endpoint	404 Not Found
Negative	Empty POST Body	Validation error
Negative	Missing Required Fields	Validation error
Negative	Invalid Data Type	Validation error
